

INVITATION FOR EXPRESSION OF INTEREST FOR SUPPLY OF 3 MILLION TONS ANHYDROUS AMMONIA OVER 10-YEAR PERIOD

Deepak Fertilisers And Petrochemicals Corporation Limited (DFPCL) is a US\$ 225 million turnover company, manufacturing Ammonia, Methanol, Nitric Acids, Ammonium Nitrate, Isopropyl Alcohol and Nitrophosphate Fertilisers at its plants at Taloja near Mumbai. Details can be obtained from the website.

DFPCL, through its wholly owned subsidiary Smartchem Technologies Limited (STL) also manufactures Ammonium Nitrate at its Srikakulam plant in Andhra Pradesh and at Vapi plant in Gujarat. All these plants are based on world renowned technologies and its operating efficiencies are benchmarked to some of the best in the world.

Leveraging on its strengths, DFPCL is setting up a new integrated chemical complex on the east coast of India at Paradeep in Orissa to manufacture 300,000 tpa of Ammonium Nitrate, which is due for completion by July 2009. Necessary storage tank to receive Ammonia for this project is already tied up. DFPCL is also constructing a shore-based 15000 te capacity Ammonia storage tank at JNPT near Mumbai to feed its fertilizer and chemical complex at Taloja and is due for completion by September 2008. This will be the only Ammonia tank in the state of Maharashtra.

DFPCL will require around 120,000 tpa of Anhydrous Ammonia from Sept'08 at JNPT port and another 150,000 tpa from Aug'09 at Paradeep port totaling to 270,000 tpa. Parcel sizes could be around 12,000 te per month. Both ports enjoy adequate draft all round the year.

Considering the large on-going needs we are keen on a long-term tie-up even with an equity/deposit investment which would allow:

- a) **Stable/less volatile pricing**
- b) **Cost plus basis in existing/new ammonia projects**

Spot-based offers are also welcome.

DFPCL will not be responsible for any cost or expenses incurred in connection with the preparation or delivery of applications / quotations. DFPCL reserves the right to accept/reject any applications, partly or wholly, without assigning any reason whatsoever.

Applications may be sent by e-mail to rosy@deepakfertilisers.com or by courier in a sealed cover at the following address before 15th December'07:

Mrs. Rosy Pereira
