return on their investment. The difference between the concession price so fixed less distribution margin and the statutorily controlled consumers' price is allowed as subsidy. The quantum of subsidy depends on the concession price, the consumer's price and the level of production.

2.02. **Payment for Import of Urea:** As indigenous production is not adequate to meet the demand for fertilizers, imports are arranged to make up for the shortfall. The cost involved is broadly the price of imported fertilizers plus the cost of handling and distribution of the fertilizers. The selling price of imported fertilizers to farmers is controlled under the Fertilizer Control Order and the consumer prices are thus statutorily regulated. This selling price is the same as the selling price for indigenous production. The difference between the amount realised by way of sale of fertilizers to farmers and the import costs to Government represents the subsidy on fertilizer imports.

2.03. **Direct Benefit Transfer(DBT) in Fertiliser Subsidy:** Provision for Direct Benefit Transfer(DBT)of subsidy on online bills.

3.01. **Payment for Indigenous P and K Fertilizers:** Provision is for payment to the manufacturers of fertilizers/agencies under the Nutrient Based Subsidy (NBS) scheme on the sale of decontrolled Phosphatic and Potassic fertilizers at concessional rate to the farmers. The concession would lead to balanced use of fertilizer NPK nutrients for better soil health and productivity.

3.02. **Payment for Imported P and K Fertilizers:** Provision is for payment to the importers of fertilizers/agencies under the Nutrient Based Subsidy (NBS) scheme on the sale of decontrolled Phosphatic and Potassic fertilizers at concessional rate to the farmers.
